IB-Green AWARD

**Climate and
Environment**

**SHOW YOUR CORPORATE
COMMITMENT
TO THE CLIMATE!**

■ THE AWARD

Green Business Spaces

The IB-Green Award is part of the European project "IB- Green: Industrial and Business Parks – Climate Resilient & Fit for the Future".

This award celebrates companies that implement blue and green infrastructure (GBI) on their premises, such as green roofs and facades, permeable parking spaces or green recreational areas.

These initiatives not only enhance employee well-being but also booster resilience against climate challenges, for example, heatwaves, heavy rain, and flooding.

■ GOALS

How the Award Works:

The IB-Green Award recognises measures in five categories:

1. Creation of green infrastructure
2. Creation of blue infrastructure
3. Reduction/adaptation of grey infrastructure
4. Networking of GBI
5. Enhancing workforce well-being and involvement

20
Questions

11 Project partners
in IB-Green

2 Implemented
measures for
GBI Starter

3
Prize categories

6
Countries in Nor-
thwest-Europe

Requirements

■ PRIZE CATEGORIES

Awards are available in three categories:

- 1** GBI Starter: Three measures from two categories
- 2** GBI Innovator: Five measures from two categories
- 3** GBI Leader: Five measures from three categories

■ ABOUT IB-GREEN

Concrete, pavers, and minimal greenery: industrial and business parks (IBPs) are especially susceptible to overheating and flooding. In the Interreg project "IB-Green", partners from six European countries are collaborating to enhance the climate resilience of IBPs.
